

Tesla Motors has been charged with over 200 criminally corrupt actions

Why do they never get hauled in by the cops?

Because the White House protects Elon Musk in exchange for campaign financing

THE FORBIDDEN TESLA TIMELINE THAT THE COVER-UP PEOPLE DON'T WANT YOU TO SEE:

- How Senators insider stock and campaign funding kickback scheme funded a car company with stock

HIGHLIGHTS:

(Full Timeline is 42 pages long)

1880's- Detroit Electric sells Electric cars commercially

1900. 38 percent of US automobiles are powered by electricity, but as Henry Ford designed the much cheaper T-Ford, the electric cars began to disappear.

1970s. The price of gasoline hits record because of a series of energy crises, so the interest in electric cars increased again.

June 1971. Elon Musk was born.

1996-1999. General Motors produced an electric car called EV1 and leased it to customers.

1999. Elon Musk sold his company Zip2 and made \$22 million. He founded X.com that would become PayPal.

October 2002. eBay acquired PayPal and Elon Musk made \$165 million.

2003. General Motors cancelled the lease program and removed the last EV1 from the streets. They said they couldn't sell enough of the cars to make the EV1 profitable.

July. Martin Eberhard and Marc Tarpenning incorporated Tesla Motors. They had earlier made a feasibility study to see if they could make an electric car. They now made a feasibility study together with AC Propulsion to see if the batteries would work.

November. The 2 employees searched for a partner to build the rest of the car. Lotus became their choice. Lotus engineers, from England, agree to provide chassis of car.

2004

February. Ian Wright, who had met Martin Eberhard while on a plane, joined the company. They finished business plan 1.0. Ian later leaves Tesla in disgust when he realizes what they are up to

March. Starting a car company is expensive, so they began to look for outside investors. Silicon Valley VC's discuss having Elon Musk take-over Tesla and get rid of the founders

April. Series A funding where Elon Musk was the main investor. Elon Musk had earlier aligned with JB Straubel, as his directed mole, who had friends at AC Propulsion, and the VC's told Elon Musk to contact Tesla. Other investors included SDL Ventures and Compass Technology Partners. JB Straubel joined the company as employee number 5.

May. An early styling study began at Tesla.

June. A technology implementation study began.

July. Tesla had 9 employees and moved to an office in San Carlos, California. They also made a "mule" which is a car that doesn't reproduce but you can see if the concept works. This fake "mule" car is shown as a real sellable car to DOE and investors, when, in fact, it is not

October. The 15 employees began to design the drivetrain component.

November. They installed the drivetrain in the Mule 1.

December. Tesla couldn't use the same design as the Lotus Elise, so they had a contest where Barney Hatt made the best design by copying most of the Lotus Elise so they would not have to pay Lotus the full licensing costs.

2005

January. They made a 1/4 scale model in clay of the design Barney Hatt had made. Tesla had now 18 employees and they also took out Mule 1 for a test drive but it was not legal to be driven on any road.

February. The now 23 employee strong company needed more money, so they made a series B funding. Not only Elon Musk invested more money, but also Valor Equity Partners. Tesla also opened an office in UK close to the Lotus office to try to tie into Lotus. Lotus is leery.

April-June. Tesla made a full-scale model in clay of the Tesla Roadster.

July. With 38 employees, they now tested a plastic model of the Roadster in a wind tunnel.

August. Some of the 41 employees began developing a motor.

December. 63 employees and they began to build the Mule 2 in fiberglass.

2006

January. A drivable Mule 2 was finished but it still isn't a production car and it is not legal for sale or driving on the road.

April. The engineers thought the Roadster was finished so they made 10 engineering prototypes (EP), which compared to a Mule can (in theory) be produced.

May. 92 employees and they finished the first EP, called EP 1. Tesla raised a series C round led by Vantage Point Partners and Elon Musk.

July. Almost no-one knew that Tesla existed, until now when Tesla showed EP 1 and EP 2 in Santa Monica, California.

August. 100 employees. Tesla crash tests and technical reports reveal fire dangers. Tesla senior staff orders the reports shredded. Tesla had earlier crashed a few virtual cars, but they needed to know if the computer models were accurate. They also began to show the Roadster at events to market it.

August. Elon Musk, John Doerr, Rahm Emanuel, Robert Gibbs and David Axelrod discuss a quid-pro-quo scheme to advance money for the Presidential and Senate campaigns and get paid back in spades from TARP and Dept. of Energy "Loans", tax credits, stock perks and monopolies.

September. 120 employees. They made more tests, including radiated emissions and susceptibility testing. EMF emissions during charging were high and those reports were ordered shredded

October. They made a durability test, which consists of driving the Roadster on a cobblestone racetrack. The idea is to simulate 100,000 miles in 6 months. It would have taken much longer time to drive the same distance on a smooth road. Tesla realized that their computer models were inaccurate - the Roadster's transmission didn't survive the durability test. Tesla is warned, by Detroit UAW executives that everything they are doing is wrong, wasting tens of millions of dollars and could damage the overall auto industry. Musk hates unions and pledges to keep unions out. He ignores the advice due to narcissism issues.

November 2004. 144 employees, and more tests, including driving through a saltwater bath.

December. They showed the EP 2 at the Los Angeles Auto Show.

2007

January. Tesla brought the Roadster to Arvidsjaur, Sweden, to see if it could survive winter conditions. It had severe charging issues

February. 205 employees. Tesla began to build a validation prototype (VP), where they took everything they learned from the engineering prototype. Tesla says it will build a \$35 million plant in Albuquerque, to produce the Model S. They lied.

March. 230 employees and they finished the VP 1.

April. In dire finances, Tesla raised more money - a series D round led by Elon Musk, Technology Partners, and Vantage Point.

June. Tesla's motor factory in Taiwan was finished and it began producing parts.

July. A new transmission was somewhat finished but still has ongoing problems.

August. Tesla finished the VP 10. CEO Martin Eberhard was replaced by Tesla investor. Tesla's are now \$100,000.00 over budget PER CAR Michael Marks, hired, who would work as an interim-CEO until Tesla found a long-term CEO.

September. Tesla delayed the launch of the Roadster because they needed more time to test its

durability.

October. Tesla transmission failed in the durability tests. Massive engineering failures are piling up. Tesla needed yet another transmission.

November. Actual Tesla Martin Eberhard is forced out of the company after confronting Elon Musk regarding Musk's manipulations. Musk orders his PR group to launch character assassination campaign against Eberhardt

December. Interim CEO Michael Marks see the lies and leaves and is replaced by interim CEO Ze'ev Drori. Bernard Tse is contracted, by Tesla, to hide the Tesla battery explosion documents that have been uncovered.

December. Tesla says it will build its factory in Southern California. They lied.

December. Sex worker hired by Musk attempts blackmail. Lawyers shut her down

2008

January. 260 employees. The VPs survived the new tests, so the Roadster was finished -except for the transmission. Tesla accountants notify Musk of impending bankruptcy. Tesla makes customers sign confidentiality agreements to keep from disclosing extensive defects and price changes that are constantly occurring.

March. Tesla began production of the Roadster. Elon Musk cheating on wife and kids with B-movie actress.

April. Tesla can't get fleet orders or sell. Bankruptcy imminent. Short term cash put in by a bridge financing led by Elon Musk and Valor Equity Partners.

May. Opened a retail store in Los Angeles, and they also finished a new transmission.

June. Opened a second retail store in Menlo Park, California, and they also delivered the first Roadster to the customers. Marc Tarpinning is sickened by the Musk plot and resigns from Tesla after getting a payout to keep quiet. The Model S was announced in a press release.

August. Franz von Holzhausen joined Tesla Motors as Chief Designer.

October. Elon Musk became the CEO so as to control all information in and out of Tesla and prevent disclosure of organized crime funding. Tesla bankrupt on paper but cooking books to hide financial disaster.

October. Tesla tells White House and DOE, In writing, it will sell 200,000 cars by 2010 December. White House staff order Dept. of Energy to only fund companies from their "special list" of campaign backers

December. Google investors and executives become key shareholders in Tesla and agree to control all media to benefit Tesla

December. Tesla says it will build its factory in San Jose, CA. It lied and it is discovered that all of the

different failed factory location announcements have to do with Dianne Feinstein's husband's screwed up real estate deals.

November. Tesla revealed it had requested about \$400 million in loans for the Model S and powertrain manufacturing, under the Department of Energy's Advanced Technology Vehicles Manufacturing (ATVM) program.

2009

March. Tesla unveiled two Model S prototypes at the Los Angeles headquarters of Tesla CEO Elon Musk's other startup, SpaceX. Tesla had decided to build a design studio at the factory. Tesla began taking reservations for the Model S. More than 500 Tesla investor connected people reserved a car in the first week in order to fake sales volume.

June. Tesla gets approval for \$465 million in low-interest loans from the Department of Energy in exchange for campaign funding provided by Tesla and Google VC's. Tesla has written over 30 lies in its Dept. of Energy Application, which Steven Chu is aware of, yet ignores, at White House request.

2010

January. Tesla registered for an initial public offering of stock. Tesla uses "free" taxpayer loan to exploit taxpayer dollars to fake the value of its stock while also receiving free tax credits which it sells at a profit in exchange for campaign funds, thus fully qualifying as an organized crime operation. This is SEC stock fraud but charges are held on special request of WH

February- Dianne Feinstein and Her real estate mogul husband manipulate the Solyndra and NUMMI/Tesla factory properties for personal profit in exchange for campaign funding

May. Tesla bought NUMMI with taxpayer money - the former Toyota and General Motors factory in Fremont (manipulated by Feinstein), California, for \$42 million. Toyota Motor and Tesla announced they will cooperate on electric vehicle development. Toyota purchased Tesla shares.

June. 800 employees. Tesla shares began trading on the Nasdaq Stock Exchange. They gained 40.5 percent from Google media PR manipulations and use of the free taxpayer money to manipulate the stated value.

2011

January. White House staff order Tesla to: "never go bankrupt until after our administration is out of office", says they will finesse any problems until then.

Fires start to show up in Tesla tests and car operations

2012

January. Tesla ended production of the Roadster to focus on the Model S.

First factory fire documented and covered up

Previously, three key Tesla executives, who were studying the engineering failures, were killed in the

same plane crash. Documents from one of the deceased executives are received by reporters. Family, or friends, of the victim are thought to be whistle-blowing

February. Tesla revealed the Model X - a small SUV and says it will go on sale in early

2012.

June. 2000 employees. The Model S was officially launched at the Fremont factory. Retail deliveries of the Model S started in the United States.

September. Unveiled the Supercharger network.

2013

May. 4000 employees.

August. First Model S in Europe. Tesla formalizes relationship with Panasonic for batteries even as Panasonic is being charged with organized crime, price fixing, dumping and the deaths of thousands of factory workers and nearby neighbors to the factories.

Tesla/Panasonic "Gigafactory" plan charged with exploiting Mexican workers with lethal work environment, toxic poisoning, nearby dangers to towns.

Musk is caught on recorded audio and video admitting that Tesla was broke when it applied for Dept. of Energy funds, thus breaking the Section 136 federal law for the ATVM and LGP loans.

Hackers designate Tesla as "The most easily hacked car in the world". Fears of eavesdropping and forced battery overload attacks

September. Shadow team of special investigators document over 30 federal crimes that Tesla, and Tesla investors, engaged in. Federal law enforcement is ordered to: "Leave Tesla alone **for now**".

Senior Tesla Motors Media Consultant quits. Reveals All! Says "STUPID, STUPID NEWS REPORTERS NOW USING FACTS INSTEAD OF TESLA TALKING POINTS, THUS RUINING THE WHOLE DEAL..."

(Parody)

Fremont, CA- As of today, there is no mention of Buzz Flapjaw on any Tesla Motors website. His name appears to have been scrubbed from all Tesla media.

Buzz is a legend in the corporate communications industry, but he now has no relationship with Tesla Motors, certainly as of this weekend.

Buzz said, "The PRESS ARE IDIOTS!" in national press releases (the results of which are shown below):

He went on to say: "The **Stupid, Stupid news reporters** are now using facts, hard data and detailed research to write their stories about Tesla Motors and Elon Musk, instead of the extensive and carefully prepared talking points we gave their news directors. You would think that our investors ad money would still give us control of the media but apparently not.."

"(Fucking Glenn Greenwald)", He muttered under his breath.. "(Jay Carney would never let this shit happen when he controlled the news...)" he continued to mutter to himself...

Buzz elaborated: "Only those of us inside Tesla can truly describe the kool aid colors (Tesla's fanboy shill bloggers favorite drink) of the bright Tesla future and the wonderfulness of just being a Rich Frat Boy Democrat, err,.. uh... Tesla Owner"

Formerly with Enron, Buzz moved on to run the General Motors ignition key safety group, and was stolen by Elon Musk (Who stole Tesla from Martin Eberhardt), from GM when his valuable disinformation skills were noted. Buzz expressed his angst and frustration with the constant concerns over Tesla's stock "activities" and the reference to Tesla as a "creepy taxpayer swindle-scam created to manipulate the stock market and exploit tax credits which Tesla's investors bribed into place".

"THAT IS JUST WRONG!", Raged Buzz, "there is nothing creepy about it!"

Buzz also commented on other controversies: "Senator Feinstein DID NOT put herself on the intelligence committee just so she could get a heads-up just before she gets caught. **She did not take bribes!** Our investors huge cash payments to her PAC are irrelevant, as are the insider stocks and real estate holdings her, and her family, profited on and we only hired her staff to help them out, not as **revolving door bribes**, people are just making things up! The fact that Elon Musk had a personal relationship with her had nothing to do with it! If you ignore the direct connection between Solyndra and Tesla, and all of the investors who are also campaign donors, which are all on the same land, you can just ... err....uhm..... Benghazi!", Said Buzz.

Also commenting on the Tesla fires, he admonished: "OK, so the Tesla patents do say, **in no uncertain language**, that the Tesla batteries will blow up and kill your family and burn your house down, but that

is not why we were just giving the patents away. Also, even though every major university has said that they way we configured the **NOT APPROVED FOR CARS** batteries creates '**the most likely scenario for an explosive fire, of any lithium ion configuration on EARTH**', the handful of cars we have sold only blow up a little bit and the **cancer-causing gas they emit** can be avoided if you get 2 miles away from them very fast while holding your breath."

He went on: " ..Tesla is getting a raw deal, you need to just ignore all the dead, and burned alive, Tesla car and battery factory workers..for GODS SAKES, all but three of them are in CHINA..They are ASIANS, they are not AMERICANS!.. who cares?!" We asked him to discuss the safety issues: "Look", he said: "Yes, we all know that Tesla's have killed multiple people and that there are multiple homicide charges but it wasn't like the car killed people, except some of them."

We asked Mr. Flapjaw about the connection between all of Google's executives and investors, Tesla's investors and campaign contributions that line up in a very symmetrical way to the Department of Energy funding. Buzz exclaimed: "What!?! You have a problem with symmetry? Look at the Tesla! It is design perfection. It is perfectly symmetrical. Symmetry is GOOD. You try to make it sound like kick-backs are a bad thing.. call them '*campaign support resources*', that doesn't sound so bad, heh?", he wiped his brow and continued.. "...So what if Google controls the media and hides all the investigations about Tesla, it is better than letting voters get all upset!"

The various charges that Tesla is an organized crime operation created as a kick-back scheme to control stock market valuations was taken to Mr. Erick Holder for comment. His secretary stated that: "Mr. Holder cannot speak to you right now, he is very busy... very, very busy. He has a lot on his mind right now. He has to redo his stock portfolio before Monday and all kinds of things.."

Buzz expects to begin work on his new job as lobbyist for the new "CIGARETTES COME FROM PLANTS AND ARE GREEN AND GOOD FOR YOU" Campaign.

When asked for comment, Mitt Romney merely smirked in a knowing kind a way...

We asked Buzz if it is true that Robert Gibbs, Jay Carney and Erick Holder told Elon Musk that he could "pretty much kill and eat human babies and we can keep it from getting ACTUAL media coverage". Buzz walked away.

Tesla shareholder suit claims Elon Musk and other board members lied about car safety

- DOZENS OF FRAUD LAWSUITS NOW PRODUCED OVER TESLA FRAUD BY SHAREHOLDERS AND INSIDERS. CHARGES ERIC HOLDER WITH RUNNING COVER-UP TO PROTECT THE WHITE HOUSE!

- CHARGES TESLA IS "A TOTAL CRIMINAL ENTERPRISE CREATED TO KICK-BACK FUNDS TO SILICON VALLEY CAMPAIGN FUNDING VC'S!"

By [Paul Carr](#)

Out of the battery fire, into the shareholder lawsuit.

Tesla shareholder Ross Weintraub has filed a derivative suit against the company and its board members — including CEO Elon Musk — alleging that a series of dishonest statements made about safety and profitability caused Tesla’s stock price to drop on multiple occasions.

A derivative suit is a legal tool used by shareholders who want to force a company to take corrective action against its own executives or, in this case, to take action directly if board members are unlikely to act. It should be noted that, to many, shareholder lawsuits are like patent trolls: An unfortunate cost of doing big business and not something that inherently bodes badly. Also, in Tesla’s case, their stock isn’t that far off its 52 week high (Chart via Google):

In the complaint, filed in Northern California District Court, and embedded below, Weintraub alleges a long history of dishonesty by the company and by Musk himself, including allegations that Tesla board members:

...allowed the Company to embark on a campaign of false and misleading statements designed to convince the market that the Model S was literally the safest car in existence.”

...allowed the Company to misrepresent the low height and configuration of the Model S battery pack as enhancing the vehicle’s safety, without disclosing its very significant vulnerabilities for high-intensity fires.”

...egregiously allowed the Company to misrepresent the Model S’s history of fire incidents which included at least three very significant fires requiring first responder intervention.

And that Elon Musk himself...

...falsely claimed that “[t]hroughout all our crash tests, throughout all similar incidents with vehicles on the road, never once has there been a fire.” When a Model S fire later occurred during the relevant time period, a Tesla spokesperson falsely stated, “This is the first fire.” Thus, by the third Model S fire, the Individual Defendants were still causing or allowing Tesla to represent that there were low probabilities of such fires while simultaneously denying that a recall was necessary.

...gave several interviews during which he downplayed this Model S fire and worse, failed to disclose that another Model S had been consumed by fire in Mexico on October 18, 2013... According to allegations in the Federal Securities Action, defendant E. Musk, with knowledge of the fire and inspection, unilaterally determined that the fire was not relevant to investors due to the circumstances under which it arose.

The lawsuit further claims that Musk and his fellow board members’ conduct “has significantly and materially damaged the Company. By virtue of the Individual Defendants’ breaches of fiduciary duties,

the Company faces a lawsuit alleging violations of the federal securities laws and Tesla has suffered significant disruption of, and damage to, its business, its reputation and goodwill.”

It then goes on to list various conflicts held by board members which would make it unlikely that they would take action against Musk of their own volition. These include the fact that board member Steve Jurvetson of DFJ is an investor in other Musk companies including Solar City and Space X.

The suit demands a jury trial. The company has until the end of this week to respond or face a judgement by default.

Updated: A Tesla spokesperson told Pando “We believe this lawsuit is without merit and intend to defend against it vigorously.”

"Elon taught himself computer programming and at age 12 sold the computer code for a video ... Elon Musk: Bruce Hillman, liar, cheat, aspiring scam artist.

www.quora.com/Elon-Musk/Can-Elon-Musk-code - [View by Ixquick Proxy](#) - [Highlight](#)

Is Elon Musk "a sociopathic, narcissistic, Senator-bribing, lying, government funding fraud, stock swindling, woman-abusing, ego-maniacal, wife-cheating, company stealing, self-promoting attention whore" like the lawsuits against him by his wives, customers, suppliers, and shareholders claim?

The Tesla Patent Giveaway SMOKE SCREEN!

Tesla has announced that they are giving their patents away, patents which state, in no uncertain terms, that their batteries can "kill you", "burn you and your family", "set your house on fire", "set your office or parking structure on fire" (Not to mention the cancer-causing fumes they release). Tesla own engineers wrote that in the their patents and Musk signed off on those patents.

So that's nice, they are giving them away. Who does this benefit?

Since 2006, EVERY SINGLE new electric car company has been sabotaged by Musk and his Silicon Valley investors, The Detroit Big 3 ([SEE THIS LINK](#)) !!! and/or the Department of Energy. Over 200 electric car companies tried to launch and every single one got lied to and stonewalled by the DOE, sabotaged by outsider take-overs who offered an investment and then generated a take-over EXACTLY like Musk did; Blockaded, by mutual agreement by the VC's; and/or regulated into non-operation by laws which were written so only the Detroit Big 3 could pass them.

So, Musk appears to be making all nice-nice by "giving away" the patents but in reality, they can't be used by anyone but the Detroit Big 3 because anybody else will be forced to endure the above-mentioned sabotage efforts. The Detroit Big 3 already have tons of their own patents and avoid any NIH (Not Invented Here) outsider technologies. So, what good are they?

There is no possible way to start, or run, an electric car company in America because Musk and his VC's along with DOE and Detroit have built **a cartel that kills off any competitors. (With a little help from Robert Gibbs and Jay Carney)**

Does President Obama care that they made him look like a fool for destroying his "Miillion Electric Cars on America's roads" promise to the Public? The sabotage was intentional! They used taxpayer money to do it! Shouldn't the WHITE HOUSE be a little bit pissed off? Yet, another thing, the President has to first find out about by reading about it in the paper?

So could this be the precursor to a Tesla bankruptcy? We have seen that they "cook the books", are we in for another "cleantech" shocker?

The Takeover Game- ANOTHER REASON WHY THE TESLA PATENTS ARE WORTHLESS...

Almost every electric car company that starts to get traction has a hostile takeover attempt. Later stage parties create a dispute which causes the founder to be forced out, bought out, quit or otherwise stop providing the impetus to deliver a disruptive technology. The process has now occurred so many times that it is beginning to look like an intentionally crafted standardized strategy by third-parties who fear market diffusion. It happened to XP but they overcame it. The "new management" usually "accidentally" tanks the company. Let's try to guess who the "third-parties" might be...BUT:

What better way to control a market than to control all of the funding for that market and then have all that controlled funding administrated by "your people" who have been placed in, and around, a federal agency! It's the "Takeover Game" on a whole new level. Do people really do these sorts of things? Imagine megalomaniac car, energy and materials company heads with billions of dollars that want to control hundreds of billions of dollars and have insane egos...

Who's Tesla's Bitch? THE LIST:

Which media outlets cover-up Tesla Motors misdeeds and abuses?

Which ones are run, or directed, by Tesla's investors seeking to manipulate stock values?

Let's track, chart and document which media outlets are willfully smoke-screening Tesla Motors.

Which outlets publish counter-stories when other outlets publish negative disclosure about Tesla to try to cover-up, or flood-out, the Tesla issues and charges?

Some reporters are compensated by Tesla's IR Department, PR contractors, founders, VC and banking groups with either cash, discounts, tickets, jobs, advertising contracts, sex workers, meals, travel and/or political access.

Send in your submissions...

Which outlets now have documented tracking evidence, that can be exhibited in court?:

-- Google (Investors)

- Hundreds of online news outlets
- Also via web routing manipulation

-- Hearst Communications (Investors)

- SF Gate
- SF Chronicle
- 15 daily and 34 weekly newspapers including
- Houston Chronicle
- San Francisco Chronicle
- San Antonio Express-News
- Albany Times Union
- Hundreds of magazines around the world, including
- Good Housekeeping
- Cosmopolitan
- ELLE
- O
- The Oprah Magazine
- 29 television stations, which reach a combined 18 percent of U.S. viewers; ownership in leading cable networks, including Lifetime, A&E, HISTORY and ESPN; significant holdings in automotive, electronic and medical/pharmaceutical business information companies

- a 50 percent stake in global ratings agency Fitch Group
- Internet and marketing services businesses
- television production
- etc...

-- Gawker Media (White House Character Attack Conduit)

- Gawker
- Gizmodo
- Jalopnik
- Kinja
- Deadspin
- Kotaku
- Jezebel
- Valleywag
- Lifehacker
- 109
- etc...

-- The A.L.I.C.E. Alliance (Investor-Synchronized Reporters)

- Stands for: American Legislative and Issue Campaign Exchange
- 1400 coordinated reporters using the "Alice News Alerts" in order to seek to cover up campaign backer crimes with synchronized story releases, include:
 - The top two political reporters for The Huffington Post
 - A Reuters reporter
 - The editor of The Nation magazine
 - A producer for Al Jazeera America television
 - A U.S. News & World Report columnist
 - Approximately two dozen Huffington Post contributors
 - All of "Gamechanger Salon"
 - Sally Kohn, formerly a Fox News contributor, now works for CNN
 - Amanda Terkel, the "Senior Political Reporter and Politics Managing Editor at The Huffington Post
 - The Huffington Post's Washington bureau chief, Ryan Grim.
 - A former New York Times freelance columnist who now works as an energy and commodities reporter for Thomson Reuters is also a member of Gamechanger Salon.
 - Anna Louie Sussman is listed as an "investigative reporter and journalist" on the Gamechanger Salon membership list, and while her beat focuses on energy issues, she has also writes about "local and international human rights and social justice issues" according to her website.
- Katrina vanden Heuvel is the editor and publisher of The Nation magazine, a prominent and well-

known periodical of leftwing political and social thought. She is also a member of Gamechanger Salon and a regular opinion writer for the online edition of The Washington Post.

- Lisa Graves, who leads the Madison, Wisconsin-based Center for Media and Democracy, is also a member of Gamechanger Salon, and – according to e-mails reviewed by Media Trackers – regularly promotes material developed by CMD to attack ALEC and the right-of-center lawmakers who tend to make up the majority of ALEC’s active legislative membership.

- Vanden Heuvel suggested in her column that liberals support the efforts of the American Legislative and Issue Campaign Exchange – ALICE (a leftwing counterpart to ALEC) – and the Progressive States Network.

- Jordan Flaherty was, as of last year, a producer for Al Jazeera America television. He is also listed as a member of Gamechanger Salon and for a while he occasionally blogged for The Huffington Post.

- In addition to working at the left-leaning American Sustainable Business Council, David Brodwin writes an online column for U.S. News & World Report.

- etc...

Top Tesla PR Department LIES:

Tesla is a "Success Story" - LIE!

Fraud Lawsuits, fires, explosions, injured workers, low sales, corruption, multiple investigations, Lemon Law violations, extensive owner defect reports, real estate fraud investigation, and more...

Tesla "paid back" it's Department of Energy "Loan" - LIE!

Tesla still gets over a hundred million dollars in subsidies, every year, from your tax money and the damage to the market, the economy, NUMMI job reduction and sabotage to competitors continues to rise in cost while the founders, and their investors, are buying escorts with your tax money.

Tesla's are "Selling like hotcakes" - LIE!

For the amount of money blown on Tesla, it has the lowest sales per volume investment dollar of ANY CAR IN WORLD HISTORY!

Tesla's are "Green", "Cleantech" clean energy cars- LIE!

It uses more toxic materials to make and run a Tesla than any other car IN THE WORLD! The Afghan war may have been advanced in order to get lithium and indium for Tesla and Solyndra for Tesla's investors.

Tesla's are "Safe" - LIE!

There are multiple police homicide charges on Tesla owners; by %, there are more drunk driver arrests in Tesla's than almost any other car; Tesla's release cancer causing smoke, brain damaging smoke & neurological damaging smoke when they burn; An inordinate number of Tesla's have blown up; The 7000+ lithium ion batteries in the Tesla have 7000+ chances of going off when any one of them gets wet or banged; Tesla's have had multiple recalls for fires including fires which burned people's homes; Tesla's go faster when you accelerate and cause more accidents because drivers lose control;

Tesla is the "people's electric car"- LIE!

Tesla was created by billionaires for billionaires in order to exploit certain minerals for their investment funds, nobody can ever afford one, they were born in corruption in a Washington DC kickback scheme. Tesla investors have bribed a large number of federal agency heads who were then forced to quit.

Tesla's are the "best made cars" with "the highest consumer satisfaction"- LIE!

Tesla bought and paid for all of it's "Consumer PR ratings". There are hundreds of defects noted in online owner posts. Even Elon Musk is quoted in interviews saying he has to "look at each car individually" because they each have problems. Google's owners also co-own Tesla so Google makes sure no actual stories about Tesla's problems get out on the internet.

There are tens of thousands of evidence items proving that Tesla is lying. That evidence is posted here, at the GAO, in the U.S. Congress and other locations you can easily find.

"RIGHT TO BUILD" Campaign against ELON MUSK Launches!

(This is a re-write of Musk's Press Release, wherein he turns the tables on what he did in the DOE scandal)

"This is not right," Tom told reporters during a news conference.

Tom said the DOE contract with Tesla amounted to a continuing crony monopoly, was unfair by blocking Tom's company, and over 200 others, from competing for deployments of consumer and government vehicles and would cost taxpayers billions of extra dollars in coming years.

"What we feel is that this is not right – that the national security of our Nation's auto options should be put up for transparent competition and they should not be awarded on a sole source, uncompleted basis because of campaign bribes," said Tom at the briefing called on short notice and held at the National Press Club in Washington, DC.

We're just protesting and saying that the DOE funding should be transparently competed," Tom said.

"If we compete and lose that's fine. But why were they not even competed?"

That just doesn't make sense."

"So far we were ALL of the way through the certification process. And so far there have been zero changes to the car. Mostly it's just been a paperwork exercise."

"Since this is a large multiyear contract, why not show the actual merits of each applicant on a side-by-side basis to the public, And then do the competition. That seems very reasonable to me."

"The fact that EVERY SINGLE INDEPENDENT CAR COMPANY WAS INTENTIONALLY CUT OUT OF THE FUNDING BECAUSE THEY DID NOT GIVE A BRIBE OR REVOLVING DOOR KICK-BACK seems to be something that should be considered a crime!"

Announcement Regarding Complaint Filing by 200 DOE Funding Applicants:

On 2008, shortly after trillions of dollars of [lithium and indium were discovered in Afghanistan](#), DOE sent out a request for American companies to build new energy and automotive solutions to help the nation.

The long-term contract was granted to only a few campaign backers on a sole-source basis without any transparent competition from other providers.

Applicants are not seeking to be awarded contracts for these monies. We are simply seeking the right to fairly compete without rigging.

Most Americans have probably never heard of the ATVM/LG program. It was implemented by The Department of Energy in to reduce the dependence on foreign energy by 25–50%, to improve reliability over the heritage energy system, and to create a more 'commercial-like' procurement process. Initially there were three competitors-- GM, Chrysler & Ford with the Detroit System.

However, following the misappropriation by all three of thousands of confidential documents, the three companies put aside their claims against each other and formed a conspiracy, citing the real issue as competition itself and asserting the new monopoly would save US taxpayers \$100-150M per year.

Since the [Detroit "Club"](#) was formed, not only have there been no savings but costs have skyrocketed. Vehicle costs are up from approximately \$10K per vehicle to \$40K per vehicle—making Detroit's vehicles the most expensive not just in the US, but the world. In addition, the United States pays

Detroit nearly \$1 billion dollars per year in subsidies just to maintain the ability to get more campaign influence—regardless of whether or not they launch a single ethical candidate. The DOE program is now the fourth largest line item in the country's entire Energy budget, with Losses now projected at nearly \$150 billion through 2030.

This legal action seeks to shine a spotlight on an issue that has gone unchecked since 2006, when the Detroit monopoly was formed creating the lack of competition in the national security auto and energy market.

The decision to file was not entered into lightly, and made only after all other avenues were exhausted.

In a Acquisition Decision Memorandum, as part of an effort to fundamentally restructure the DOE program, The GAO directed the DOE to “aggressively” bring competition into the Program and expressly stated his intent was to “obtain the benefits of competition as quickly as possible.”

Importantly, in a follow-on letter to the Government Accountability Office issued in 2013, many American's also expressly made clear that New Entrants would be in a position to compete once all forms had been filed. “The Department [of Energy] will allow new entrants to compete for launch awards as soon as the new entrant delivers the data from their final certification.” By design, certification is meant to run in parallel to the competition—with certification required just prior to the actual contract award.

The Tesla contract with DOE was negotiated and executed outside of public view and all communications around it have never been made public. Reporters, and investigators, have requested the contract using the Freedom of Information Act (FOIA) but has not yet received a response. As a result, to this day, no one except Steven Chu and the government really knows precisely what the inside deal says or what it requires.

What we did learn, the day after the Senate hearings on the DOE "competition", was that Tesla was nearly broke when they applied and that this violated the law regarding this ATVM/LGP Congressional funding; That senate staff and Senators were working For Tesla; That Tesla stated numerous lies in it's DOE application; that the Tesla car submitted was not even designed or engineered; That a real-estate scheme involving Tesla and Solyndra was under-way and hundreds of other facts which appear to be criminal.

Clearly the block crony contract is in direct opposition with the very notion of competition. It maintains the Detroit and [Silicon Valley VC \(See This link too\) \(And this One\) \(And this One\)](#) monopoly until at least 2018, perhaps well beyond. And it will needlessly cost taxpayers hundreds of billions of dollars and has already cost American lives in Afghanistan and elsewhere.

The contract is made even more egregious in light of deteriorating U.S. relations with Russia, who Silicon Valley VC's had partnered with to mine the Afghan minerals for Tesla and Solyndra.

The majority of DOE launches are performed by Fisker, Tesla, , A123, Enerdel, Solyndra and Abound launch vehicles, which use the toxic, exploding chemicals from Afghanistan

that explode when they get wet or banged, release cancer-causing smoke in combustion, and continue the dependence on foreign energy sources. Enerdel, Severstal and many of the DOE funded entities had owners who, themselves are owned and controlled by the Russian government.

Some of these people are on the United States' sanctions list. As the U.S. contemplates additional sanctions against the Russian defense sector, it is incongruous and damaging that DOE continued to send millions of dollars to Russian controlled entities to support U.S. national security and energy.

Given international events, this seems like the wrong time to send hundreds of millions of dollars to the Kremlin and Silicon Valley Oligarchs – especially considering there are domestic alternatives available and qualified to compete today that do not rely on components from countries that pose a national security risk.

Each **DOE failure costs American taxpayers roughly \$400 million** – four times as much as Senators get in bribes, and at least twice as much as any provider in the world.

It's a false premise to suggest that a more expensive car is a more reliable car. Prices have increased because there is no competition.

The American Independent Auto and Energy Industry is better able to control costs because our factories are built in the 21st century and take advantage of both new design innovations and new manufacturing techniques. As a private company with no government subsidies, our business only succeeds when we deliver our customers' payloads safely and reliably to orbit. We stand ready and able to reliably provide launch services at an estimated cost savings of 75%.

To be clear, "The American Independent Auto and Energy Industry who did not bribe Senators" is not seeking to be awarded any contracts. We are simply seeking the opportunity to fairly and transparently compete — for any qualified company to fairly compete. If we compete and we lose fairly, that's ok too. But to not be given the opportunity to compete at all, especially in light of the U.S. Government's stated interest in competition and current dependence on Russia and Silicon Valley Oligarchs for national security and energy, just doesn't make any sense.

Signed- The American Independent Auto and Energy Industry
